Agenda

1. UI Implementation

2. Acknowledge-ments

Basic Implementation

- Basic Implementation:
  - UITabBar, UITableView (system default)
  - NavigationTabBarController
  - NavigationListController
  - ......

- Why not use system default UITabBarController?
  - Although easy-to-use, it lacks of customized functions for our app, e.g.,
    - Customization of UITabBar
    - The co-existence with other view controllers

Acknowledgements

People who have also contributed a lot to this feature:

- John Sheppard, Teyla Emmagan
- Rodney Mackay
- Elizabeth Weir

Any Questions?
